WORK EXPERIENCE

Network Operator

7-star | Saddar Rawalpindi

2021 - 2022

- Designing and planning the network infrastructure to meet the organization's needs.
- Installing and configuring network devices such as routers, switches, firewalls, and servers.
- Setting up IP addresses, subnets, and VLANs.
- Selecting appropriate hardware and software components.

Backend

AppInSnap | Islamabad

2022 - 2023

- Identifying and fixing bugs, as well as writing unit tests to ensure the reliability and functionality of the software.
- Created web-based user interfaces using technologies like ASP.NET, HTML, CSS, and JavaScript.
- Implementing automation for various aspects of the software development lifecycle, including code integration, testing, deployment, and infrastructure provisioning.
- Setting up and maintaining CI pipelines to automatically build, test, and integrate code changes into the main codebase.
- Automating the deployment of applications to various environments, such as development, testing, staging, and production.

Full Stack

Embrace It | Islamabad

2023 Onwards

- Version control systems like Git to manage code changes and collaborate with other developers.
- Creating documentation for code and applications, including user guides and API documentation.
- Optimizing code and applications for performance and scalability.
- Collaborating closely with backend developers, UI/UX designers, and other team members to integrate frontend and backend systems, ensuring a cohesive and functional application.
- Conducting testing and debugging to identify and resolve issues with the frontend code. This includes using browser developer tools, automated testing frameworks, and manual testing.
- Designing and coding web interfaces to be responsive, adapting to various screen sizes and orientations, including desktops, tablets, and smartphones.

Full Stack

Ultimus | NYC USA

- Version control systems like Bit-Bucket to manage the code and collaborate with developers
- Testing and Debugging of code to identify the problems and issues we are facing.
- Designing the Front-end side, Handling the Databases and automating the CI/CD.
